Frequentist and Bayesian Views of Randomization

TUESDAY, October 23, 2012, at 2:00 PM

110 Eckhart Hall, 5734 S. University Avenue

ABSTRACT

Randomization is among the most subtle of inferential topics. While it is widely used, how to understand it is still open. This talk contrasts a Fisherian view of randomization with a Bayesian view.

Joseph Kadane is the Leonard J. Savage University Professor Emeritus at Carnegie Mellon University. His prize-winning recent book "Principles of Uncertainty" may be downloaded at: <http://uncertainty.stat.cmu.edu>.
