A Brief Investigation into Issues of Correlation in Fantasy Football

MONDAY, March 9, 2015, at 11:00 AM
Eckhart 117, 5734 S. University Avenue

ABSTRACT

Despite the widespread popularity of fantasy football, there has not been significant statistical investigation and analysis of many aspects of fantasy football. The goal of this paper is to investigate the correlation of fantasy point production of offensive players on the same team and discuss its implications for fantasy football participants.
