

The Physical Sciences Collegiate Division and
The Physical Sciences Division
announce

The Physical Sciences Teaching Prize

Each year the Physical Sciences Collegiate Division and the Physical Sciences Division present a teaching prize to a graduate student in the Division in recognition of exceptional teaching of undergraduates. (The seven departments comprising the Division are Astronomy and Astrophysics, Chemistry, Computer Science, Geophysical Sciences, Mathematics, Physics and Statistics.) The prize, \$750 and a certificate, will be awarded annually to the graduate student who has been most effective in undergraduate instruction in a course offered by the Division during the previous calendar year (Spring 2005 through Winter 2006).

Up to three prizes will be awarded each year. Nominations may be made by any University affiliated person, but special consideration will be given to nominations by undergraduates or groups of undergraduates. Nominations, which should consist of a typewritten page outlining the graduate student's contributions to undergraduate education, signed by the nominators, must be received by the office of Michael Foote, Master, Physical Sciences Collegiate Division, Harper Room 224, by the end of Winter Quarter (March 17, 2006).
